

The Applied Computational
Electromagnetics Society

The 27th International Review of Progress in Applied Computational Electromagnetics

March 27-31, 2011

Williamsburg, Virginia

Vendor & Exhibitor Information

The Applied Computational Electromagnetics Society (ACES) Conference is soliciting exhibitors for our 2011 event.

During the past several years, computer modeling and numerical methods have been rapidly maturing as essential problem solving tools for most electromagnetics applications. ACES is *the international, interdisciplinary professional society* for this technology. It was formed in order to promote information exchange among computational electromagnetic practitioners – both users and developers. While in its 27th year, ACES has grown to nearly 600 members from over 28 countries.

Our conference is comprised of technical sessions, short courses, training sessions, interactive poster sessions and computer demonstrations, and vendor exhibits. Over the past few years, we have had approximately 300 or more attendees at the ACES Conference.

A wide range of companies and products has been exhibiting at past conferences. A sampling of these products includes computer hardware (personal computers and workstations and specially equipped computers for accelerated electromagnetics computations), computer software (electromagnetic and microwave design, graphical computational tools, CAD products, CAE tools, data analysis, parallel-computing tools), measurement and device design (antenna, radar and microwave measurement and diagnostic tools) and printed literature (such as technical books and journals).

You will find the format of our exhibit show especially designed to maximize your connectivity and minimize your costs. The exhibits will be held on Monday, March 28th, through Wednesday, March 30th, from 9:00 AM until 5:00 PM in the main exhibit area.

Exhibitor's booths include a skirted table, two chairs and access to electricity. Backdrops are available upon request. A more detailed description of the provided materials is given in the Exhibition Rules and Regulations will be sent to interested parties. The cost of one exhibition space (booth) will be at a flat rate of \$1000 for the entire main period of the conference.

We are very excited about our Society's growth. At the ACES Conference, you will have an opportunity to connect with individuals leading the way in computational electromagnetics and to influence a growing and interactive group of technologists. Please notify us of your wish to participate well in advance as the number of available slots for exhibitors will be filled on a first come, first served basis. Please feel free to contact us to arrange for an exhibit.

We hope to see you there!

C. J. Reddy and Erik Vedeler

ACES 2011 Conference General Chairs
